Personal Statement

Having recently graduated with a First-Class degree from Falmouth University, I am a young and aspiring graduate with a passion for writing and technology. Designing narrative-driven games and writing complex long-form academic work at university has given me proficiency in navigating technology and adapting to all kinds of new software, as well as experience in working alongside a team of developers. I'm highly enthusiastic to provide my skills to any great working opportunity!

Education

Falmouth University, Cornwall, *September 2022 – May 2025*
BA(Hons) Games Development: Writing - **First Class Degree**

Hornsea Sixth Form, East Yorkshire, *September 2020 – May 2022*
A-Levels: Ancient History and English Literature – **B, C**
BTEC: Computing – **Merit**

Certified 'FA Playmaker' – *September 2021*

Experience

Visitor Experience Volunteer at National Maritime Museum. *October 2024 – June 2025*

- Dedicated 4 hours a week in a Visitor Experience role. This involved welcoming and guiding the public around the museum, as well as learning daily tide times and information surrounding the vessels moored in Falmouth's harbour.
- Performed my own research of the exhibits and facilities around the Maritime Museum to best inform and assist the general public throughout their museum experience.
- Followed a shift timetable to be stationed around different exhibits of the museum at certain times.
- Instructed adults and children of how to control wind-powered model sailboats, teaching them how to use equipment properly and safely.
- Developed good communication skills with my superiors to ensure the exhibits were all in working condition and no electrical, physical or mechanical faults had developed.

Freelance Website Design and Development Work with PD Freelance. *June 2021*

- Assisted the lead developer in designing unique interactive websites, utilising HTML and CSS languages.
- Consulted with my employer to mediate certain website needs and limitations, taking user experience into account.
- Developed mock logos, website layouts and graphics using Adobe Photoshop.
- Maintained a consistent communication pipeline with the lead developer to ensure work was being completed efficiently and effectively.

Thank you for your time!
